

Building and Implementing Enterprise Solutions

# MAXIMISING YOUR ORACLE OR PEOPLESOFT APPLICATIONS

application configuration / implementation / business intelligence / upgrades /  
migration / application managed services / healthchecks

*All local and central government agencies face the challenge of doing more with less. The strong focus on citizen service levels and the need to demonstrate best value dictates an enterprise approach and world class ICT solutions and support. Finding an application partner who can provide advice through the application lifecycle can help you meet your challenge.*

*Selecting and implementing package ICT solutions invariably demands that agencies identify and work with external partners. For larger agencies there is often an element of self sufficiency so they may look for support from a partner that can offer some specialism in business process and/or IT. For smaller businesses, a partner that offers a complete range of skills to support them is likely to be more suitable.*

### **About the Hedra Consortium**

The Hedra Consortium is the premier solutions specialist dedicated to serving the needs of public services through the OGCbuying.solutions framework arrangements. The Hedra Consortium offers a full range of solutions, specifically designed for public services, including central government, local government, education, defence, utilities and energy, transport, health and emergency services. Over £200m of services and solutions have been delivered to public services by the consortium.

Compel is the consortium's Oracle and PeopleSoft enterprise solutions specialist. Our practical knowledge and understanding of enterprise applications enables us to bring unique and creative solutions to our customers in the public services and in the private sector. We offer a range of services from a two day 'application health-check' through to enterprise solution design, implementation and support.

### **About Compel Business Solutions**

We are the largest independent Oracle and PeopleSoft practice in the UK. We employ 140 highly skilled consultants from a diverse range of business and technical backgrounds. We are specialists in:

- Oracle e-business suite and technology solution delivery
- PeopleSoft enterprise solutions delivery
- Oracle and PeopleSoft upgrades and migration
- Oracle Business Intelligence solutions
- Oracle and PeopleSoft application managed services
- ConfigSnapshot for easy Oracle e-business applications management.

We take pride in what we do and seek to apply our skills and experience for the benefit of our clients. We believe in the solutions and products we work with and have the experience of having completed over 400 successful Oracle and PeopleSoft projects. We are very proud to have won over 20 partner awards since 2000.

## **Application managed services from Compel Business Solutions**

Compel has been providing enterprise applications support and managed services since 1996. We work both on-site and remotely on a 24x7 basis. We are uniquely positioned to offer a compelling, cost-competitive and client-intimate service and help our clients to secure consistently high levels of service and support across Oracle technology, Oracle e-business suite and PeopleSoft enterprise. Where hosting is required, we work with Netstore, also within the Hedra Consortium.

All our services are designed to deliver key benefits back to your organisation, by:

- reducing the total cost of application ownership
- increasing the service levels and availability of your applications
- offering a broad and specialised range of critical skills
- extracting further value from your existing Oracle / PeopleSoft asset base
- freeing people up for the front line.

Compel is part of the 2e2 Group, an IT service provider and trusted partner to some of the UK's largest private and public service organisations, with over 1600 employees.

## End-to-end solution delivery

In delivering customer solutions, we draw upon the specialist capabilities of each member of the wider Hedra Consortium to deliver a complete end-to-end solution as required:

- business solution services – a full range of advisory, business change and management consulting services
- system integration services – the consortium can provide a full range of application development and integration services across all platforms
- infrastructure services – a full range of infrastructure design, specification, implementation and ongoing management solutions
- integrated applications solutions – the supply and implementation of a wide range of solutions from leading technology suppliers currently covering the following solution areas: CRM, ECM, Business Intelligence, e-learning, document scanning, capture and secure sharing and ERP
- fully managed services – both on-site and hosted to deliver an integrated application and infrastructure managed service solution.
